AMUSEMENTS.

MRS. LANDRE. - Next Monday even ing, at the Mns. Lander,—Next Monday even ing, at the Academy of Music, Mrs. General Lander will appear in her great historic role of Elisabeth. The following, from the New York Evening Gazette, shows the high opinion entertained of her performances in New York:—

She has accomplished the difficult task of pleasing an audience already made fastidious by the splendid acting of Ristori in the same part. Not possessing the superb physical advantages of Ristori, nor her perfect finish of detail, which made every attribute of that great

detail, which made every attribute of that great actress a picture by itself, Mrs. Lander's personation, if more rugged, impresses one with a sense of its reality to a far greater degree than did that of the great tragedienne. Mrs. Lander is undoubtedly the best actress upon the Ameri-

ENGLISH OPERA. -This is the last night of the Richings' Troupe at the Academy. Gounod's Faust will be given for the first time (in Eaglish) in this country. The cast is unusually fine, and great curiosity is evinced to hear Mr. Campbell in the role of "Mephistopheles.", Faus will be repeated at the matinee to-morrow after noon. Miss Laura Waldron made a very suc-cestul debut last evening as "Arline," in the Bohemian Girl. She will be a great favorite

ARCH.-Mrs. John Drew takes a benefit this evening. Surf will be given for the last time but one. Next Monday grand revival of the popular sensational play of last season, Rosedale; or, The Rifle Ball, with Mrs. John Drew and the whole company in the cast. WALNUT,-Mr. John Brougham repeats his

successful new play of The Lottery of Life. AMBRICAN. - The Red Gnome, a splendid pantomime: Les Trois Graces, a beautiful bailet; Smith and Brown, a laughable farce, and other good things, this evening and to-morrow after-

Notice is given that a light is now exhibited from a light vessel moored at the entrance of the Liau river, north coast of the Yellow Sea.

The light is a fixed white light, and in clear weather should be seen from a distance of eight miles.

The lightyessel has three masts, and is moored in 5½ fathoms, with Tower hill bearing 8, by E. ½ E.; and the mouth of the river NE, by E. ½ E. Baskets are placed on the top of two of the mast; the minant yard is always crossed, and from this mast signals are made. From the lightyessel the two buoys in the river can be seen, one with the eye, the other with a telescope.

All bearings are magnetic, Variation 5 30 degrees westerly in 1867.
